

Works On Contact—
With No Added
Fragrance!

Contact N®

Non-scented Odor Counteractant with Multi-Bacterial Action

Ideal for:

- Hotels
- Hospitals
- Nursing Homes
- Daycare Centers
- Schools
- Airplanes
- Locker Rooms
- Veterinarians
- Residences
- Automobiles
- Mass Transit Vehicles
- Pet Areas
- ...and more

New two-stage, ready-to-use **Contact N** works *immediately* upon application to safely neutralize smoke, food, pet and other odors in fabrics, carpets, upholstery, medical settings, pet bedding and more—without introducing a fragrance!

First, the offending odor-causing molecules are encapsulated on contact, immediately eliminating the malodor. Then, a blend of five nonpathogenic bacterial strains rapidly start to work—digesting and destroying the *source* of the odor.

Microbial action continues, with all bacterial strains becoming fully involved within 4-6 hours. **Contact N** combats organic waste and odor problems, without using toxic and caustic chemicals.

**Great For Removing
Odors From Furniture,
Carpets and Drapes!**

With a new focus on allergy issues and aversions to introducing fragrances in many healthcare and other facilities, **Contact N** provides a superior solution to current products on the market.

The scientifically developed product is specially formulated to provide the strongest microbial action in the industry today. And, where some popular odor counteractants must be applied only to dry surfaces, **Contact N** will also work on moist or wet areas.

Contact N is the perfect solution to have on hand for treatment of unexpected spills or accidents, and for treatment of severe or continuous odor problems.

Contact N[®]

Non-scented Odor Counteractant with Multi-Bacterial Action

*Applications for
Contact N are
endless!*

- ✓ Safe to use. Safe for the environment.
- ✓ Immediate odor neutralization on contact—with no residual scent.
- ✓ Powerful technology provides consistent performance every time.
- ✓ Biodegradable surfactants for added cleaning power.
- ✓ Scientific formula contains over 300 ingredients, plus a five-strain blend of beneficial bacterial cultures.

Special counteractants in **Contact N** provide *immediate* relief from offensive malodors—without using toxic and caustic chemicals or subjecting humans and animals to harmful cleaning agents or fumes.

Then, microbial action takes over to rapidly consume the organic source, penetrating surfaces and working deep inside for permanent odor elimination.

Depending on the severity of the odor, additional applications may be required. For situations that require extended treatment, covering the area with a damp cloth will provide a favorable environment for microbial activity to continue.

Contact N has proven effective on hydrogen sulfide, ammonia, volatile fatty acids, vomit, urine, feces, garlic, cigarette and countless other malodors.

Ideal for use in bathrooms, kitchens, locker rooms, hotel rooms, daycare centers, schools, patient rooms—wherever a fast, fragrance-free solution to odors is needed! Also excellent for pet odors, it can be used in homes, veterinary facilities, animal shelters, calf hutches, boarding kennels, pet stores and grooming centers.

Contact N deodorizes *on contact* by destroying the source of bad odors. Atomizing it into the air as a room deodorizer will not be effective and is not recommended.

SOME SUGGESTED APPLICATIONS:

Draperies, Furniture, Car Interiors, Carpets, Bedding, etc. — Spray contaminated fabrics and surfaces with ready-to-use **Contact N**. When treating deep pile carpets or furniture, thoroughly saturate area and allow to remain damp for several hours. When dry, simply vacuum to remove any residual soils and surfactants.

Floors & Walls — Add one part **Contact N** to three parts water in mop bucket. Mop thoroughly, leaving the floors wet. Dispose of used mop water into drains to enhance the bioactive cleaning action throughout the plumbing lines.

Kennels & Runs — Wash surface with full-strength **Contact N** by mopping or applying to entire area. Allow excess to soak into porous surfaces.

Drains & Plumbing Lines — Add 4-5 ounces weekly to keep lines free-flowing and odor-free.

ORDER INFORMATION:

Part #90-1334, 32 Oz. Spray, 6/cs., 15 lbs.

Part #90-1335, 5 Gal. Mini-Drum, 1/ea., 44 lbs.
