

Hydroponic Solutions

For Organic & Indoor Gardening Odors

A 'GROWING' PROBLEM

Gardening hydroponically and/or in traditional large-scale indoor or home environments can release odors. Humidity, the use of fertilizers and other nutrient solutions, as well as organic matter and bacteria are typical causes of these odors. Measures can be taken to reduce odors, but often times they persist. To combat grow room odors, Vaportek's *safe, environmentally friendly treatment systems* are easy to use and do not adversely affect people, plants, or pets. Our technology will not affect the taste or smell of your plants!

OUR SYSTEMS

Treat atmosphere, contents, and structures simultaneously! Vaportek's unique odor control systems employ proprietary compounds of select natural oils that are hermetically sealed into specially formed membranes. The membranes permit the oils to breathe through the surface of the envelope, allowing a safe dry vapor to be diffused into the air.

When Vaportek's compounds are volatilized, they react directly with odorous molecules in the air. Through this molecular interaction, Vaportek products effectively neutralize and/or cause these problematic malodorous molecules to be inactivated. With our dry vapor compounds' high mobility in the air and its ability to penetrate porous substances such as wallboard, wood, carpeting, cement, insulation and other surfaces, our unique technology is able to permanently neutralize imbedded odors.

Unlike ozone generators, which have strict safety regulations and potentially negative effects, Vaportek products require no special training or precautions.

FEATURED PRODUCT

Optimum 4000

Designed for constant deodorization, this electric unit is capable of treating areas **up to 20,000 ft³**. Adjustable dial on front of machine allows precise control of odor-neutralizing dry vapor. Virtually silent. Replaceable cartridges last up to 120 days. Available in various fragrances; Classic Neutral recommended for most effective deodorization.

Vaportronic

Battery-operated cabinet capable of treating areas **up to 10,000 ft³**. On/off switch, adjustable pulsing fan. Effective up to 30 days. Use from 1-5 EZ-Disks. Available in several fragrances.

Heavy-Duty Standalone Cartridge

Non-electric; simply rotate adjustable end caps to control air flow. Designed specifically for use in HVAC systems; also recommended for use with high-velocity blowers and fans. Capable of treating areas **up to 20,000 ft³**. Cartridges are rated for 270 hours of service and are available in 3X Industrial and S.O.S. (Smoke Odor Solution).

Vapor Shark

Popular, versatile electric unit is capable of treating areas **up to 50,000 ft³**. Durable aluminum housing and powerful internal fan. CSA/CUL approved. Replaceable membranes rated at 270 hours of service. Uses 1-5 replaceable membranes. Membranes available in 3X Industrial and S.O.S.

 **VAPORTEK—Green Before There Was 'Green'** 

THE VAPORTEK ADVANTAGE

- ◆ Safe, natural oil technology.
- ◆ Does not create ozone.
- ◆ Easy to use; rapid, powerful deodorization.
- ◆ Eliminates odors; no masking or cover up.
- ◆ No evacuation of people, pets or plants necessary during use.
- ◆ Does not introduce moisture into the area.
- ◆ Nontoxic; no danger of combustion.
- ◆ Will not affect the taste or smell of your plants

Pioneering Simple Solutions for Tough Odors Naturally Since 1979

OUR MISSION

Vaportek’s mission is to responsibly serve its customers, employees and the environment. Through dynamic product innovation, environmental awareness, and dedication to service, Vaportek is committed to continue building on its reputation as a leader in air treatment technology. We are **proud to produce ozone-free and hydroxyl-free products.**

PROVIDING IDEAL SOLUTIONS FOR:

- ◆ Hydroponic gardeners & hobbyists
- ◆ Medical marijuana growers, dispensaries & patients
- ◆ Traditional greenhouse/indoor growers
- ◆ Condo/apartment managers
- ◆ Landlords/tenants
- ◆ Cigar/smoke shops

WHO WE ARE

Since 1979, Vaportek has built on a strong foundation by adapting its *environmentally preferable* technology to versatile delivery systems and adding complementary liquid products that combine to provide preferred air treatment for a variety of markets. Originally developed for use in cancer wards, Vaportek’s unique technology serves disaster restoration, medical, hospitality, hydroponic, athletic, automotive, pet, janitorial, and many other markets. We are also an *international company* with distributors worldwide.

Vaportek’s dry vapor systems utilize natural essential oils to neutralize smells related to indoor growing settings without upsetting the ecological balance or harming the environment. The ease-of-use, safety, effectiveness, and cost savings of these proven products make them the *preferred choice* when evaluating options for the elimination of hydroponic and grow odors. Whatever the severity of odors or the size of the treatment area, Vaportek has a safe, simple solution. Inquire for advice about the right product for any job.

PROUDLY MADE IN THE USA

IMPORTANT

Our systems provide safe, effective *alternatives* to ozone. It is *not* recommended for use with ozone generating equipment.

ENDORSED PERFORMANCE

“The **Vapor Shark** was able to **effectively control** the strong odors that emanate during the harvesting and trimming aspects of growing and processing medical cannabis. This makes that part of the process much easier to complete because the strong odors normally associated with this aspect are not affecting the surrounding environment. Also the **Optimum 4000** did an **amazing job** controlling medical cannabis odors during medicated smoking in hotel and home settings. There was actual visible smoke in the air in the room, yet the room smelled of cinnamon from the Vaportek machine.”

—*Med-Fresh, Inc.*

“**Nothing beats Vaportek** for odor elimination! I used to own a mold abatement and fire restoration company and Vaportek products were our **product of choice** for odor elimination. If using Vaportek products for a grow, place the unit inside the grow area. The **vapor will not harm plants**. Many who run Vaportek products run a unit inside and a unit outside the grow for fail-safe protection.”

—*Amazon Product Review*

“I love the product.”

—*Sunflower Supplies*

“Our customers have used Vaportek for **over 8 years** to combat the persistent odors associated with indoor gardening. It is a **tried and true odor solution** that masks malodors and makes them nearly undetectable. We have found that combining Vaportek with one of our HID Hut Carbon Cannon filters to keep a room under negative pressure is an end-all problems solution. Even better is the fact that you can use the **Heavy-Duty Standalone 3X Industrial cartridges** in conjunction with nearly any garden’s duct fans.”

—*HID Hut, Inc.*

“I believe **the product does what is claimed**. For smaller gardens we like the flexibility of the **Vaportronic** wall cabinet and disks. For the larger gardens we recommend the **Optimum 4000** with the variable release. Vaportek has an **exceptional** line of products with **phenomenal** results. If you have an indoor garden and are serious about odor control, then Vaportek is a company you need to look into.”
