

Aromatherapy Program An Introduction

Aromatherapy — the use of pure essential oils from plants as a form of treatment — has its roots in ancient healing practices. Today, aromatherapy is a widely used practice that is increasingly offered to patients in both hospitals and hospice facilities as part of a new approach to better health. Use of essential oils is on the rise as people discover the therapeutic benefits to this integrative type of holistic therapy.

Vaportek's aromatherapy line was introduced in 1993 to help provide customers, who had discovered the therapeutic benefits and unique aesthetic enjoyment of using essential oils, with the ability to enhance and improve their indoor environments. By combining its extensive worldwide experience in air cleaning and odor control with experts in the field of aromatics, Vaportek developed its own innovative technology to safely deliver a variety of pleasing aromas throughout large open spaces or selected interior areas. Vaportek's signature products are designed to broadcast an invisible, nontoxic dry vapor. Vaportek's delivery systems represent a proven standard for effectiveness and ease of use, and use only pure essential oils.

Seasonal Scents Program

Every season brings fragrant changes. With the VaporTek Seasonal Scents Program, you can bring those changes indoors anytime of the year! Enliven your space with scents that match the season. Or, choose a scent that satisfies your nostalgia for a season yet to come. VaporTek offers a variety of seasonal scents sure to delight your patients, particularly those in hospice and memory care units.

Each quarter, choose specially selected seasonal fragrances for use in your Vaportronic 2.0 or Optimum 4000 aromatherapy delivery systems.

Our innovative aromatherapy delivery systems dispense a customizable scent through the use of unique, replaceable disks and cartridge technology. Natural essential oil formulations create a safe dry vapor that provides effective, long-lasting fragrance diffusion you can change with the seasons.

Vaportronic 2.0

The Vaportronic 2.0 is an electronic aromatherapy delivery system that has the capacity to hold up to five long-lasting aroma disks, plus it features an adjustable pulsing fan. Designed to be used wall-mounted or freestanding. It has the capacity to enhance areas from 2,000 to 10,000 ft³. Batteries provide infinite opportunities for placement. See reverse side for fragrances under 34-7600 series. Replaceable disks are effective for up to 30 days.

Optimum 4000

The Optimum 4000 is a versatile electric system that delivers aromatherapy quickly and safely using a simple, spill-proof, and replaceable cartridge. Originally developed for use in cancer wards, the Optimum 4000 is also used with specially formulated odor-neutralizing cartridges in medical clinics, long-term care facilities, and hospitals. Virtually silent, the unit features an adjustable dial that allows complete fragrance control. The unit delivers constant, soothing, and therapeutic aromas in areas up to 20,000 ft³. Cartridges are rated up to 120 days of use. See reverse for fragrances under 90-4120 Series.
